INDEX

Abrams, Duff A.

Making Good Concrete, 75.
Tests of Impure Water for Mixing Concrete, 442.
Discussion, 339, 524, 530, 542.

Acheson, W. M.

Discussion, 729.

Admixtures.

Economic Value of Admixtures, by J. C. Pearson and Frank A. Hitchcock, 312.

Aggregate.

Weighing Concrete Aggregate on Highway Pavement, by R. W. Crum, 296.

Ahlers, John G.

Discussion, 398, 527, 530.

Ahlers, John G., and Walker, Stanton.

Field Tests of Concrete, 358.

Allen, L. H.

Discussion, 532, 600.

Aluminate Cement.

See **Cement.**

American Concrete Institute History.

The Progress of Two Decades, by Richard L. Humphrey, 22.

Architecture.

Architectural Concrete, by John J. Earley, 157.

Architecture.

Reinforced-Concrete Architecture These Past Twenty Years, by Albert Kahn, 106.

Bates, P. H.

Discussion, 355.

Behavior of Concrete.

Report of Committee E-6, on Destructive Agents and Protective Treatment, 564.

Blocks.

Tentative Standard Specifications for Concrete Building Block and Concrete Building Tile, 663.

Blocks.

See also **Products.**

Bloecher, Walter P.

Discussion of the Results of Tests of Job Concrete, 433.
Discussion, 538.

Bosch, Jacob.

Discussion, 549.

Boyden, H. C.

Discussion, 402.

Boyer, E. D.

Discussion, 541.

Breed, H. E.

Discussion, 729.

Brick.

Tentative Standard Specifications for Concrete Brick, 666.

Bridges.

Old and New Methods of Constructing Concrete Bridges, by J. B. Hunley, 259.
Reinforced-Concrete Bridges, by A. E. Lindau, 122.

Brown, R. L., and Slater, W. A.

Control of Concrete for the University of Illinois Stadium, 403.

Buente, C. F.

Discussion, 693.

Building Codes.

Building Codes and Their Relation to the Concrete Products Industry, by William F. Lockhardt, 221.

Buildings.

Earthquake in Japan, by Joseph F. Ruble, 210.

How Structures Withstood the Japanese Earthquake and Fire, by H. M. Hadley, 188.

Report of Committee P-1 on Standard Building Units, 661.

Reinforced-Concrete Architecture These Past Twenty Years, by Albert H. Kahn, 106.

Tentative Standard Specifications for Concrete Building Block and Concrete Building Tile, 663.

Canals.

Use of Concrete for Dams, Tunnels, Culverts and Canals, by Arthur P. Davis, 89.

Carey, W. H.

Discussion, 548.

Cement.

See also **Portland Cement.**

Cement.

What We May Expect to Do With Aluminate Cement, by Henry S. Spackman, 348.

Chapman, C. M.

Discussion, 398, 576.

Columns.

A Study of Bending Moments in Columns, by F. E. Richart, 495.

Concrete Block.

See **Products.**

Concrete Brick.

See **Products.**

Concrete Machinery.

Mechanical Equipment for Handling Concrete, by A. W. Ransome, 96.

Concrete Mixing and Placing.

Control of Concrete for the University of Illinois Stadium, 403.
Discussion of the Results of Tests of Job Concrete, by W. P. Bloecher, 433.
Field Tests of Concrete, by John G. Ahlers and Stanton Walker, 358.
Field Tests of Concrete Used on Construction Work, 420.
Making Good Concrete, by Duff A. Abrams, 175.
Notes on Designing Concrete Mixtures with Instructions to Masonry Inspectors, 275.
Tests of Impure Water for Mixing Concrete, by Duff A. Abrams, 442.
Weighing Concrete Aggregate on Highway Pavement, by R. W. Crum, 296.

Concrete Products.

See **Products.**

Construction Methods.

Old and New Methods of Constructing Concrete Bridges, by J. B. Hunley, 259.
Question Box for Construction Superintendents, 523.
Report of Committee C-1, on Contractors Plant, 648.
Report of Committee P-6, on Field Methods, Suggestions for the Production of Better Concrete, 556.

Contractors Plant.

Mechanical Equipment for Handling Concrete, by A. W. Ransome, 96.
Report of Committee C-1, on Contractors Plant, 648.
Report of Committee P-6, on Concrete Plant Operation, 633.

Crum, R. W.

Weighing Concrete Aggregate on Highway Pavement, 296.
Discussion, 247.

Curtis, A. J. R.

Discussion, 546 et seq.

Culvert.

Relation Between the Wall Thickness and Diameter of Concrete Culvert Pipe for Highway Use, by G. W. Hutchinson, 237.

Use of Concrete for Dams, Tunnels, Culverts and Canals, by Arthur P. Davis, 89.

Dams.

Use of Concrete for Dams, Tunnels, Culverts and Canals, by Arthur P. Davis, 89.

Davis, H. A.

Discussion, 548.

Drain Tile.

Tentative Standard Specifications for Concrete Drain Tile, 678.

Dunning, Max.

Discussion, 532.

Earley, John J.

Architectural Concrete, 157.

Earthquakes.

Earthquakes in Japan, by Joseph F. Ruble, 210.

How Structures Withstood the Japanese Earthquake and Fire, by H. M. Hadley, 188.

Egelhoff, R. F.

Discussion, 527, 531.

Expansion Joints.

Report of Committee E-8, on Expansion Joints, 619.

Failures.

Report of Committee E-6, on Destructive Agents and Protective Treatment, 564.

Fairchild, L. F.

Discussion, 541.

Ferguson, John A.

Disintegration of Concrete on Monessen Bridge, 568.
Discussion, 616.

Fire Resistance.

Report of Committee P-5, on Fire Resistance of Concrete Building Units, 580.

Floors.

Standard Specifications for Concrete Floors, 739.

Foundations.

Concrete for Foundations in Water Front Work, by Maxwell M. Upson, 135.

Freeman, P. J.

Serious Concrete Failures and Their Causes and Remedies, 564.

Gardner, F. E.

Discussion, 552.

Garrod, J. A.

Discussion, 540.

Gienhard, E. W.

Discussion, 546.

Ginsberg, Frank L.

Discussion, 531.

Gleason, Kate.

Discussion, 529.

Gould, N. J.

Discussion, 527.

Grady, J. C.

Discussion, 524.

Hadley, H. M.

How Structures Withstood the Japanese Earthquake and Fire, 188.

Havlik, Robert F.

Concrete Products, 145.
Demonstration in Making Trim Stone and Ornamental Concrete, 250. Discussion, 550.

Hilker, E. W.

Discussion, 547.

Highways.

Relation Between the Wall Thickness and Diameter of Concrete Culvert Pipe for Highway Use, by G. W. Hutchinson, 237.
Weighing Concrete Aggregate on Highway Pavement, by R. W. Crum, 296.

Highways.

See also **Roads.**

Hitchcock, Frank A., and Pearson, J. P.

Economic Value of Admixtures, 312.

Hollister, S. C.

Discussion, 518, 528, 530, 543, 615.

Houses.

Building Fireproof Homes, by Paul Hueber, 487.
Recommended Practice for the Design and Construction of Concrete Dwelling Houses (Report of Committee S-5, on Reinforced-Concrete Houses), 603.

Hueber, Paul.

Building Fireproof Homes, 487.

Hughes, E. E.

Discussion, 730.

Humphrey, Richard L.

The Progress of Two Decades, 22.

Hunley, J. B.
Old and New Methods of Constructing Concrete Bridges, 259.

Hutchinson, G. W.
The Relation Between the Wall Thickness and Diameter of Concrete Culvert Pipe for Highway Use, 237.
Discussion, 328.

Ingberg, S. H.
Discussion, 602.

Irwin, A. C.
Discussion, 616.

Johnson, A. N.
Use of Concrete in Road Construction, 53.

Johnson, N. C.
Discussion, 310.

Kahn, Albert.
Reinforced-Concrete Architecture These Past Twenty Years, 106.

Kelley, F. W.
Cement Is the Magic of Concrete, 43.

Lindau, A. E.
Reinforced-Concrete Bridges, by A. E. Lindau, 122.

Locke, C. E.
Discussion, 539.

Lockhardt, William F.
Building Codes and Their Relation to the Concrete Products Industry, 221.
Discussion, 552.

Longley, J. E.
Discussion, 692.

Loving, M. W.
Discussion, 549.

Lowell, John W.
Discussion, 547.

Martin, E. S.
Discussion, 521.

Morris, Clyde T.
Discussion, 518.

Nomenclature.
Report of Committee E-4, on Nomenclature, 577.

Ornamental Concrete.
See **Products.**

Pavements.
Standard Specifications for Portland Cement Concrete Pavement—
One-Course Portland Cement Concrete Pavement for Highways, 695.
Tentative Standard Specifications for Portland Cement Concrete Pavements—
Two-Course Portland Cement Concrete Pavement for Highways, 710.
One-Course Portland Cement Concrete Street Pavement, 716.
Two-Course Portland Cement Concrete Street Pavement, 724.

Pearson, J. C., and Hitchcock, Frank A.
Economic Value of Admixtures, 312.

Piles.
Concrete for Foundations in Water Front Work, by M. M. Upson, 135.

Pipe.
Relation Between the Wall Thickness and Diameter of Concrete Culvert Pipe for Highway Use, by G. W. Hutchinson, 237.
Tentative Standard Specifications for Plain Concrete Sewer Pipe, 669.
Tentative Standard Specifications for Reinforced-Concrete Sewer Pipe, 686.

Porter, G. W.
Discussion, 552.

Portland Cement.
Cement Is the Magic of Concrete, by F. W. Kelley, 43.

Priester, O. F.
Discussion, 527.

Products.
Architectural Concrete, by John J. Earley, 157.
Building Codes and Their Relation to the Concrete Products Industry, by William F. Lockhardt, 221.
Concrete Products, by Robert F. Havlik, 145.
Demonstration in Making Trim Stone and Ornamental Concrete, by R. F. Havlik, 250.
Products Plant Problems, 546.
Report of Committee P-1, on Standard Building Units, 661.
Report of Committee P-6, on Concrete Plant Operation, 633.
Question Box for Construction Superintendents, 523.

Ransome, A. W.
Mechanical Equipment for Handling Concrete, 96.
Discussion, 539.

Research.
Engineering Research in Concrete and Reinforced-Concrete, by Arthur M. Talbot, 168.

Richart, F. E.
A Study of Bending Moments in Columns, 495.
Discussion, 521.

Roads.
Standard Specifications for Portland Cement Concrete Pavement—
One-Course Portland Cement Concrete Pavement for Highways, 695.
Tentative Standard Specifications for Portland Cement Concrete Pavements—
Two-Course Portland Cement Concrete Pavement for Highways, 710.
One-Course Portland Cement Concrete Street Pavement, 716.
Two-Course Portland Cement Concrete Street Pavement, 724.
Use of Concrete in Road Construction, by A. N. Johnson, 53.
Weighing Concrete Aggregate on Highway Pavement, by R. W. Crum, 296.

Ruble, Joseph F.
The Earthquake in Japan, 210.

Schwada, J. G.
Discussion, 533.

Sewer Pipe.
Tentative Standard Specifications for Plain Concrete Sewer Pipe, 669.
Tentative Standard Specifications for Reinforced-Concrete Sewer Pipe, 686.

Sewers.
Standard Specifications for Monolithic Concrete Sewers and Recommended Rules for Concrete Sewer Design, 757.

Sidewalks.
Tentative Standard Specifications for Portland Cement Concrete Sidewalks, 732.

Slater, W. A., and Brown, R. L.
Control of Concrete for the University of Illinois Stadium, 403.

Slater, W. A., and Walker, Stanton.
Field Tests of Concrete Used on Construction Work, 420.

Slater, W. A.
Discussion, 520.

Small, A. R.
Discussion, 600.

Spackman, Henry S.
What We May Expect to Do With Aluminate Cement; What We Cannot Do With Portland Cement, 348.

Standards.
Standard Specifications for Concrete Floors, 739.
Standard Specifications for Monolithic Concrete Sewers and Recommended Rules for Concrete Sewer Design, 757.
Standard Specifications for Portland Cement Concrete Pavement—One-Course Portland Cement Concrete Pavement for Highways, 685.
Tentative Standard Specifications and Building Regulations for Concrete Staves, 660.

Tentative Standard Specifications for Concrete Brick, 666.
Tentative Standard Specifications for Concrete Building Block and Concrete Building Tile, 663.
Tentative Standard Specifications for Concrete Drain Tile, 678.
Tentative Standard Specifications for Plain Concrete Sewer Pipe, 669.
Tentative Standard Specifications for Portland Cement Pavements—
Two-Course Portland Cement Concrete Pavement for Highways, 710.
One-Course Portland Cement Concrete Street Pavement, 716.
Two-Course Portland Cement Concrete Street Pavement, 724.
Tentative Standard Specifications for Portland Cement Concrete Sidewalks, 732.
Tentative Standard Specifications for Reinforced-Concrete Sewer Pipe, 686.

Staves.

Report of Committee P-4, on Concrete Staves, 657.
Tentative Standard Specifications and Building Regulations for Concrete Staves, 660.

Stresses.

A Study of Bending Moments in Columns, by F. E. Richart, 495.

Superintendents.

Question Box for Construction Superintendents, 523.

Talbot, Arthur N.

Engineering Research in Concrete and Reinforced-Concrete, 168.
Discussion, 399, 563.

Tests.

Control of Concrete for the University of Illinois Stadium, by W. A. Slater and R. L. Brown, 403.
Discussion of the Results of Tests of Job Concrete, 433.
Engineering Research in Concrete and Reinforced-Concrete, by Arthur M. Talbot, 168.
Field Tests of Concrete, by John G. Ahlers and Stanton Walker, 358.
Field Tests of Concrete Used on Construction Work, by W. A. Slater and Stanton Walker, 420.
Fire Resistance of Concrete Building Block, Report of Committee P-5, 580.
Making Good Concrete, by Duff A. Abrams, 175.
Tests of Impure Water for Mixing Concrete, by Duff A. Abrams, 442.

Tile.
Tentative Standard Specifications for Concrete Building Block and Concrete Building Tile, 663.
Tentative Standard Specifications for Concrete Drain Tile, 678.

Tubesing, W. F.
Discussion, 526, 528.

Tunnels.
Use of Concrete for Dams, Tunnels, Culverts and Canals, by Arthur P. Davis, 89.

Turner, J. A.
Discussion, 526, 528, 542.

Upson, M. M.
Concrete for Foundations in Water Front Work, 135.
Discussion, 523 et seq., 564.

Usilton, L. H.
Discussion, 538.

Walker, Stanton, and Ahlers, John G.
Field Tests of Concrete, 358.

Walker, Stanton, and Slater, W. A.
Field Tests of Concrete Used on Construction Work, 420.

Walker, Stanton.
Discussion, 398, 529, 534.

Warren, G. E.
Discussion, 567.

Waterproofing.
Report of Committee E-7 on Waterproofing, 641.

Weiss, Philip.
Discussion, 547.

Weitz, R. W.
Discussion, 538.

Woolson, Ira H.
Discussion, 601.
